3	Set Screw M5x20	600NI520ASNIN	1
4	Amp Hanger	550PCTAMP0-RDH-AN	1

**Rebuild kits**

Kit Name	Kit part number	Quantity	Part number	Description
Derailleur Hanger kit	SP-ASP	2	550PCTAMP0-RDH-AN	Derailleur Hanger

## FAQ

### **Q: What type of axle would you recommend?**

A: The amp was designed to be used with a 135x10mm bolt up rear hub to hold it firmly in place in the horizontal dropouts.

### **Q: What kind of headtube?**

A: pre 2012 1-1/8 integrated, 2012 and after is tapered between 1.125" at top (44.0mm diameter) to 1.5" traditional bottom (49.61mm diameter)

### **Q: what size bottom bracket?**

A: the amp uses a standard threaded 73mm width and works best with 118mm bb spindle or longer.

### **Q: What's the biggest tire that can fit?**

A: the amp was designed around a 2.20 tire, however depending on the tire it may accept a bit larger but then your mud clearance will suffer.

### **Q: what is the best gearing for single speed?**

A: it depends on you, but general guys like around a 2:1 ratio or 52 gear inches. For example: a 28 tooth front ring with a 12 tooth cog at the back. There are some great resources online and one of the best is Sheldon Brown

## Warranty
